

IMPORTANT NOTES

If the CRL <45mm:

Please review the case with your physician and rebook the patient according to the guidelines of your place of practice.

To avoid delay in screening, if you are unable to review the case with a physician and rebook your patient, please perform a dating ultrasound, record all required information on the requisition (i.e., CRL, U/S date, all practitioner information) **except** for the NT measurement (write “N/A, patient too early for eFTS”), and send the patient for bloodwork.

If the CRL >84mm:

If the CRL is >84mm, please perform a dating ultrasound, record all required information on the requisition (i.e., CRL, BPD, U/S date, all practitioner information) **except** for the NT measurement (write “N/A, patient too late for eFTS”), and send the patient for bloodwork.

If you do not have an Ontario NT ID number:

If you do not have an Ontario NT ID number, you cannot perform NT ultrasound and fill out this requisition without the supervision of an Ontario NT certified practitioner. The Ontario MMS labs cannot process an eFTS screen without the NT ID number, name, and signature of an Ontario NT certified practitioner.

The figure is a screenshot of the section on the Multiple Marker Requisition that needs to be filled out by the sonographer. There are numbered arrows that point to the different areas of this section, which are further described below the screenshot.

1. Arrow “1” points to “U/S Date”.
2. There are two arrows that are numbered “2”. One of the arrows points to “CRL” and the other arrow points to “NT”.
3. Arrow “3” points to “BPD”.
4. Arrow “4” points to “Operator Code”.
5. There are two arrows that are numbered “5”. One of the arrows points to “Site”, and the other arrow points to “Site phone #”.
6. There are two arrows that are numbered “6”. One of the arrows points to “Name” and the other arrow points to “Signature”.
7. Arrow “7” points to “IUFD”.
